

THIS 6 FOOT RIDER DEFINES EASY MOBILITY!

At just 615lbs, and very compact dimensions, this unit can be transported with ease and placed on a slab very early in the process.

Great for getting into tight areas and for use where stickups are present.

The BXR836 is also great for multi-story applications due to its ease of hoisting.

With its low profile, this unit provides excellent sight-line to the slab and you can feel the concrete as it progresses in its finish transition.

Also, a perfect jump to riding, for those currently only walking.

TECHNICAL SPECS
